

Emergency Response & Evacuation Testing Evaluations

Date of Drill: 10/11/17

On October 11, 2017, OCC convened the Emergency Response Policy Committee and the Chancellor's Cabinet and conducted a table top exercise. This session included training and an exercise on:

- Emergency response
- Initiating the emergency alert system (tested and working properly)
- Coordination of efforts with first responders
- Evacuation procedures

It was the first time the College partnered with Oakland County's Department of Homeland Security in an exercise at the off-campus Emergency Operations Center (EOC). The interaction included remote access of the closed circuit television system and campus maps; everyone involved in the emergency response and notification procedures had an opportunity to review their role and responsibilities.
